SmartZone Range

Smart Conventional Fire Alarm System

SMART CONVENTIONAL Simple conventional wiring - and in fire the panel shows **exactly which sensor**: **ZONE 1 SENS: 03**. No more searching a whole floor.

Figure 1 SmartZone-4 - 4 Zone Smart Conventional Fire Alarm Panel

Why SmartZone

Finds the fire fast

Zone and sensor address on the display.

Easy, low-cost wiring

Two wires per zone, like any conventional system.

Works with what you have

Manual call points and conventional detectors on the same zones.

Set up at the panel

Sensor addresses are set from the panel - no tools.

Always watching

Zone wiring, mains and battery checked all the time.

Event history

Last 100 events with date and time.

Where to use it

Offices, shops and showrooms | schools and coaching centres | clinics and small hospitals | hotels and guest houses | apartments and villas | warehouses, godowns and small factories
